

OMS Release Notes – July 2026

Release Notes – OMS Enhancements

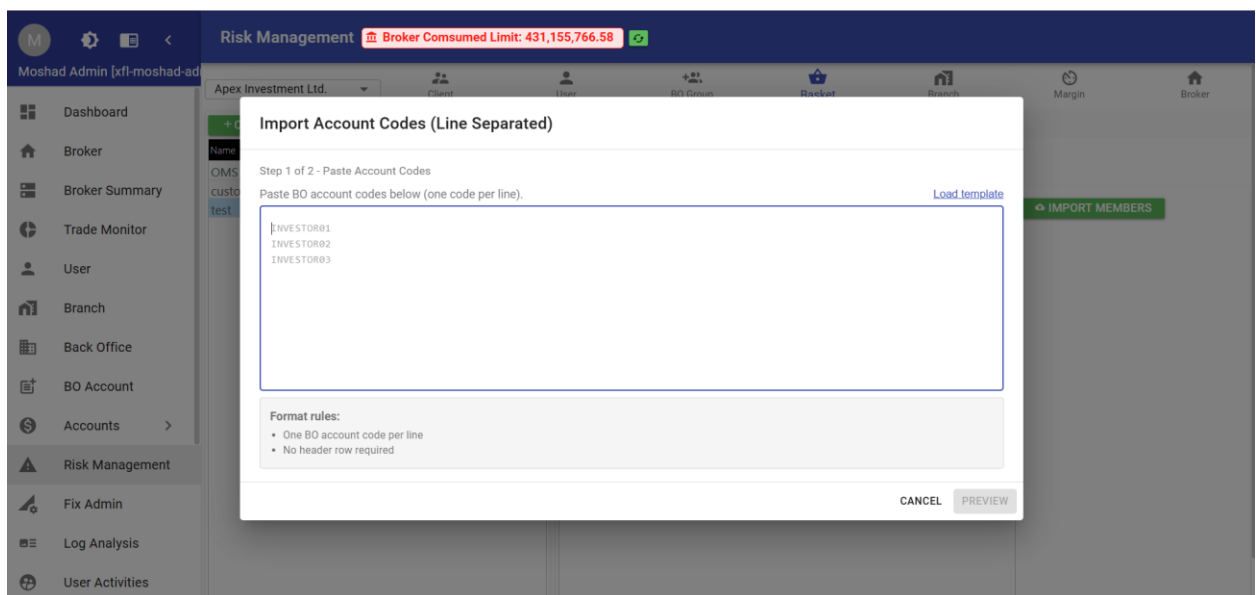

The following enhancements and improvements have been deployed in the latest release.

1. Bulk Member Upload in Basket Trading (Risk Management)

A new **Bulk Member Upload** feature has been introduced in the **Basket Trading** module under **Risk Management**. Users can now only upload multiple **BO Accounts**—using the **Basket** icon instead of entering them individually.

Key Benefits

1. Supports bulk upload of multiple BO Accounts.
2. Allows users to paste data in the prescribed format.
3. Reduces manual effort and improves operational efficiency.

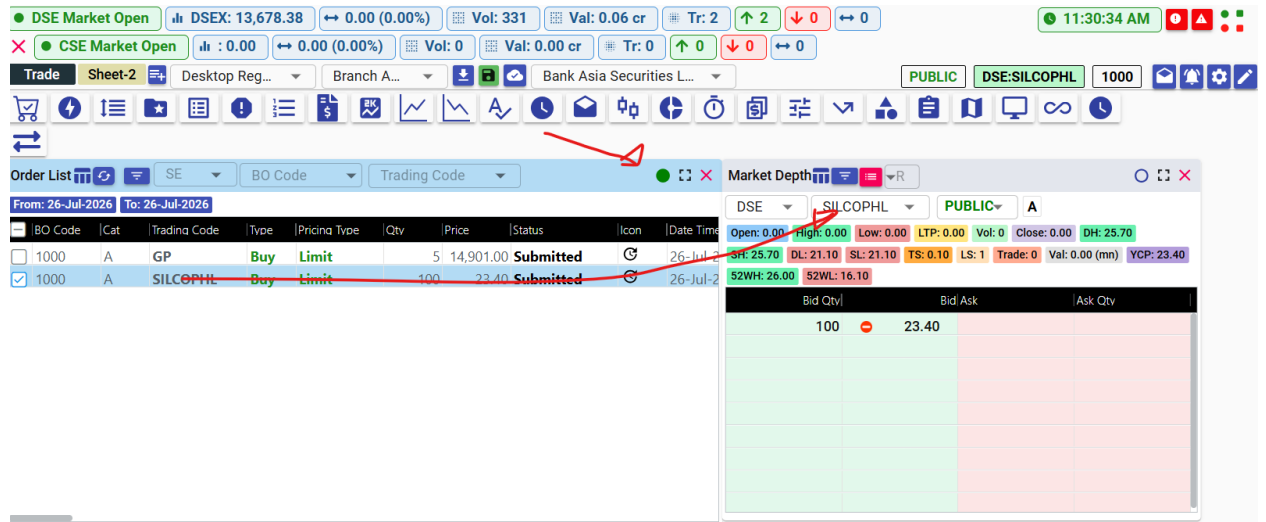

2. Order List Linked to Market Depth

The **Order List** is now directly linked to the **Market Depth** window. Selecting an order from the grid automatically displays the corresponding instrument in the Market Depth panel.

Note

1. This feature works when the **Order List** is displayed with any colour mapping enabled.

OMS Release Notes – July 2026

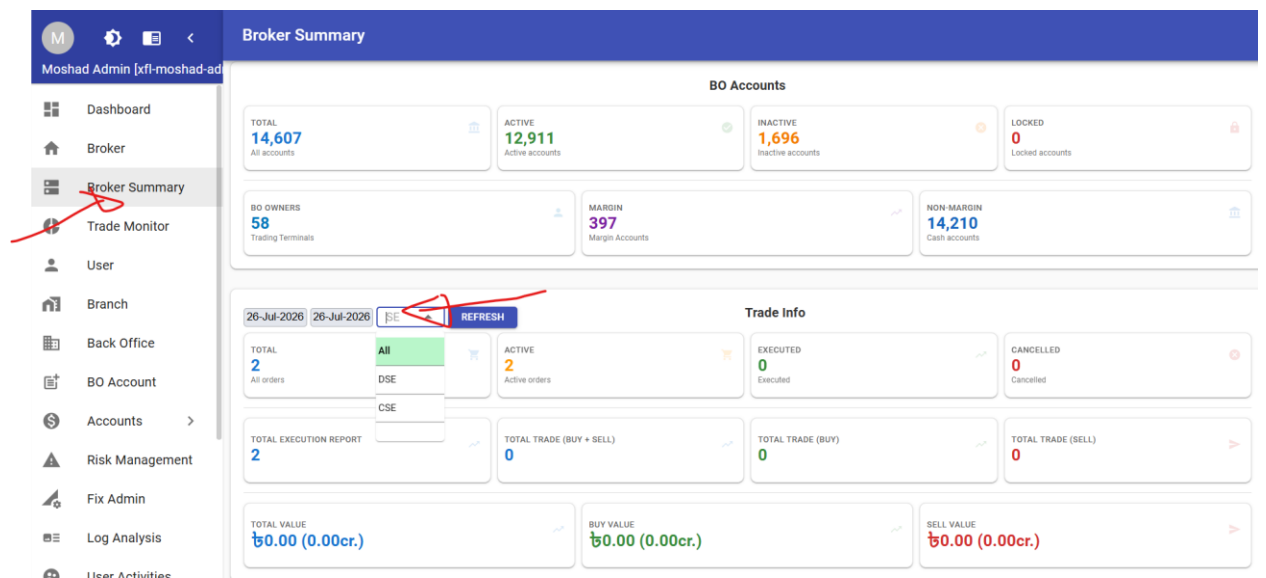

3. Stock Exchange Filter Added to Broker Summary

A new **Stock Exchange** filter has been added beside the date range selector in the **Broker Summary** screen.

Key Benefits

1. View exchange-specific trading information.
2. Quickly switch between **DSE**, **CSE**, or **All Exchanges** for reporting and analysis.

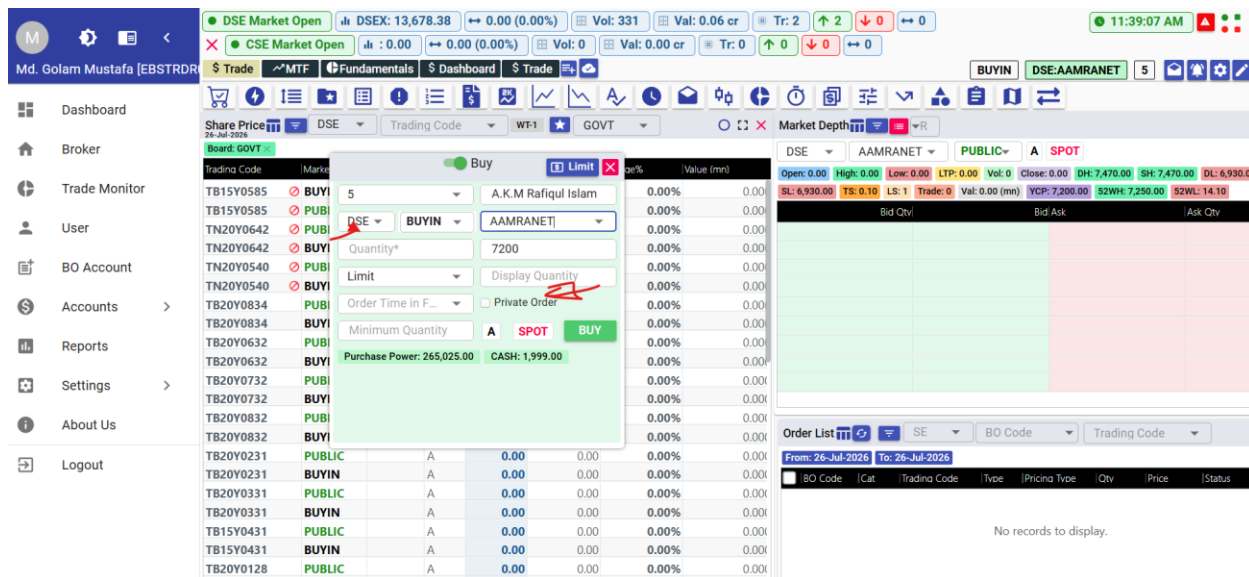

4. Private Order Option Removed for CSE

The **Private Order** checkbox is now automatically hidden when **CSE** is selected as the trading exchange.

Reason

1. The **Chittagong Stock Exchange (CSE)** does not support private orders, preventing users from selecting an unsupported option.

5. Last Selected Exchange Retained in Order Window

The system now remembers the **last selected trading exchange** in the Order window.

Key Benefits

1. Automatically loads the previously selected exchange when opening a new order.
2. Reduces repetitive user input.
3. Improves trading workflow and user convenience.

OMS Release Notes – July 2026

The screenshot displays the OMS (Order Management System) interface. At the top, there are status bars for 'DSE Market Open' and 'CSE Market Open', both showing a price of 0.00 and a volume of 0. Below these are tabs for 'Trade', 'MTF', 'Fundamentals', 'Dashboard', and 'Trade'. A red arrow points to the 'DSE:SIBL' tab, which is currently selected. The main area is divided into three sections: a table of trading codes, a market depth view, and an order list.

Trading Codes Table:

Trading Code	Market	Trading Sta.	Cat	LTP	Change	Change%	Value (mn)
DUTCHBANGL	PUBLIC	A		0.00	0.00	0.00%	0.00

Market Depth View:

The market depth view shows the current market state for 'DSE' and 'AAMRANET'. It includes fields for 'Open', 'High', 'Low', 'LTP', 'Vol', 'Close', 'Bid', 'Ask', 'YCP', 'SZWH', and 'SZWL'. The 'Bid' and 'Ask' columns are highlighted in green and red respectively.

Order List:

The order list is currently empty, displaying 'No records to display.' The list includes columns for 'BO Code', 'Cat', 'Trading Code', 'Type', 'Pricing Type', 'Qty', 'Price', 'Status', 'Icon', and 'Post Date'.
